Leading The Way To Safety™

Safely Evacuate and Minimize the Chaos
SafeEVAC.com | 812.482.9526

 **Stac**
SafeEVAC Strategic Partner

The world's most comprehensive and **INTELLIGENT EVACUATION SYSTEM**

SafeEVAC has developed an AI-powered emergency detection and evacuation technology that drastically reduces chaos in the midst of emergencies.

Our technology can instantaneously provide critical directions and information to everyone in the building and to First Responders in response to any type of emergency.

LEADING THE WAY IN 5 MAJOR CATEGORIES IN INTELLIGENT EVACUATION

Detection

Identification of the threat through multiple devices and sensors.

Action

System can immediately activate and engage a family of Intelligent Exit Signs (Verbal/Visual).

Execute

Evacuation/Safety Plan implemented in concert with SafeEVAC's advanced OPS Center with focus specific to the threat.

Alert

Notifies First Responders of emergency (911/Administrators /OPS Centers) improving response times.

Communicate

OPS Center actively provides real time information to First Responders and gets medical help in position fast.

Standing ready to **KEEP PEOPLE SAFE**

Building Evacuations
in as little as

20
SECONDS

In an emergency situation, it can be nearly impossible for people to know what to do and emergency responders often lack intel when trying to determine the magnitude and location of the threat. Our intelligent exit signage and risk-based evacuation plans are revolutionizing the way we communicate during an emergency.

SafeEVAC activates and within seconds all occupants, responders and law enforcement, know what to do and where to go.

**EXIT STRATEGIES AND SHELTER
AREAS PREDETERMINED THROUGH
EMERGENCY PLANNING**

**OUR 24/7 OPS CENTERS
CONTINUOUSLY GIVING
AUTHORITIES INSIGHT IN
TO ROOM OCCUPANCY**

**EXITS ARE CLEARLY MARKED
AND INTELLIGENT EXITS STAND
READY TO QUICKLY DIRECT.**

When emergencies happen **SafeEVAC** rapidly protects providing verbal and visual communications within seconds.

-  DANGER AREA
-  CAUTIONS OCCUPANTS
-  DIRECTS FIRST RESPONDERS
-  SAFE EVACUATION
-  SHELTER-IN-PLACE

SHELTER IN-PLACE

Safe right
where
you are

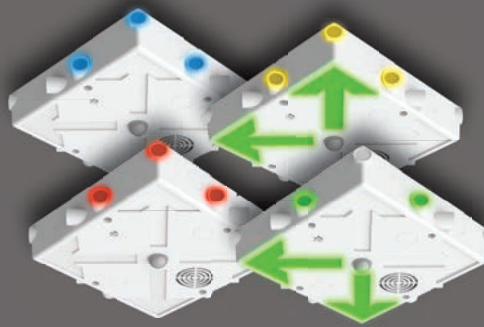

WHEN EMERGENCIES SUCH AS TORNADOS AND MEDICAL ISSUES ARISE, SafeEVAC INSTRUCTS EVERYONE TO STAY PUT OR DIRECTS THEM TO SAFE ROOMS.

PATENTED SYSTEM

FEATURING NEXT GENERATION AI THREAT IDENTIFICATION

Intelligent Exit Signs

*Intelligent Hallway
Intersection Exit Signs*

*Intelligent Supplemental
Exit Signs*

ACTIVE AI MONITORING

Camera, microphone and gunfire detection is present in every sign.

Our technology integrates with existing systems, such as fire alarms, cameras, and FOBS to Alert AI Server and OPS Center of potential emergency.

EMERGENCY ASSESSMENT

AI and OPS Center review potential dangers in real time and determine if response is necessary.

RAPID RESPONSE

System alerts everyone in building of what to do and where to go, within seconds, utilizing speakers and lights:

DANGER AREA Danger! Seek Shelter, Avoid Threat!

CAUTIONS OCCUPANTS to Potential Danger

DIRECTS FIRST RESPONDERS to Emergency Epicenter

SAFE EVACUATION Alert! Evacuate to Safe Area!

SHELTER-IN-PLACE Stay Put! Await Instructions!

Leading The Way To Safety™

LEARN MORE AT [SafeEVAC.COM](https://www.SafeEVAC.COM)

“Following the Parkland High School tragedy in Florida, our state leaders implemented lots of new laws intended to harden and prevent future acts of violence. As a Florida Superintendent of Schools with nearly 12 years of experience in this position, I have considered numerous school safety technologies. This past year, I had the privilege of hosting the leadership team from SafeEVAC as they demonstrated their threat identification and intelligent evacuation technology. I am convinced that this technology can save lives and bring peace of mind to schools and communities, should the unthinkable happen again. This is a product I believe could have very useful inclusion in all schools, including my own here in Gulf County!”

— Jim Norton, Superintendent, Gulf District Schools

24/7

OPS CENTER VALIDATION

This helps avoid false positive alarms that cause occupancy and First Responder disruption. Also provides real time info to First Responders.
